Abstract of **JP 2000122871 (A)**

PROBLEM TO BE SOLVED: To allow a client to download without being aware of an application format. SOLUTION: A client downloads an application through a representative server. The representative server receives an application request and acquires the application from an application server 102 in place of the client. The representative server converts the application into a format that is suitable to the client and then transmits it to the client 103.
